STEAM DAYS

Dec. 12-14

Students will rotate through STEAM stations highlighting a specific hands-on scientific concept. Students will encounter these challenges- building a tall tower using only spaghetti noodles and packing peanuts, how potential and kinetic energy help move wooden spools across the floor, and designing a complex marble drop with funnels, rails and other devices. Please coordinate with your student’s homeroom if you would like to volunteer.

We celebrate all people on Friday, December 15th with the “Christmas Around the World” theme.
